

Capability	
Capability	Information Sharing
Capability Definition	Information sharing is the ability to conduct multijurisdictional, multidisciplinary exchange of public health and medical related information and situational awareness between the healthcare system and local, state, Federal, tribal and territorial levels of government and the private sector. This includes the sharing of healthcare information through routine coordination with the Joint Information System for dissemination to the local, state and Federal levels of government and the community in preparation for and response to events or incidents of public health and medical significance.

Capability 6 - Information Sharing	
Function 1	
Function	1. Provide healthcare situational awareness that contributes to the incident common operating picture
Function Description	Provide situational awareness regarding the status of healthcare delivery into the ongoing flow of information to assist with the creation of an incident common operating picture. This includes providing information to the full spectrum of healthcare partners. This encompasses the real time sharing of actionable information between healthcare organizations and incident management to assist decision makers with resource allocation and provide healthcare organizations with incident specific information.

Capability 6 - Information Sharing	
Function 2	
Function	2. Develop, refine, and sustain redundant, interoperable communication systems
Function Description	Communications interoperability enables healthcare organization emergency communication systems to communicate with existing incident management emergency communications systems. With these systems in place, healthcare organizations can communicate with multiple agencies, relevant response partners, stakeholders, and other healthcare systems through radio and/or associated communications systems permitting an exchange of information in real time, when needed, and when authorized.
