### Unprecedented Global Discoveries & Collaboration

The world is working together with a shared mission to end cancer. Every year thousands of incredible new advances are discovered. The OSF Breakthrough Treatment Center works to connect patients to the very best of these discoveries close to home and contribute its own groundbreaking advances for the greater good.

# The Best Discoveries

The very best discoveries are put through rigorous pre-clinical study to see which advances hold the most promise and can move into the clinic.

# **OSF Early Detection Patient**

OSF Cancer Patient

Early Detection is the best hope to fight complex disease

Standard of care is far more likely to be effective when disease is caught early or prevented all together

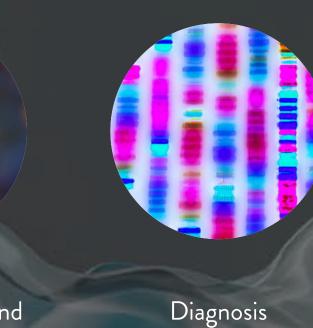

# THE BREAKTHROUGHJOURNEY

### The Best of the Best Clinical Trials

The Breakthrough Treatment Center selects and creates access to some of the most promising breakthroughs and clinical trials

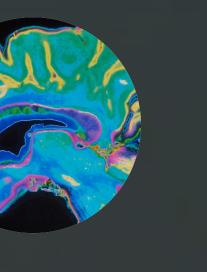

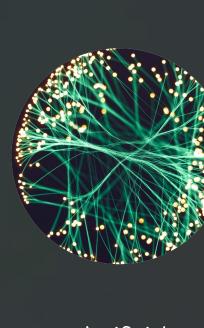

Surveillance and Monitoring for Cancer Recurrence

Initial Diagnosis

If standard of care fails breakthrough medicine is also more likely to be effective when the disease is treated earlier

Standard of Care fails

### OSF Breakthrough Treatment Center

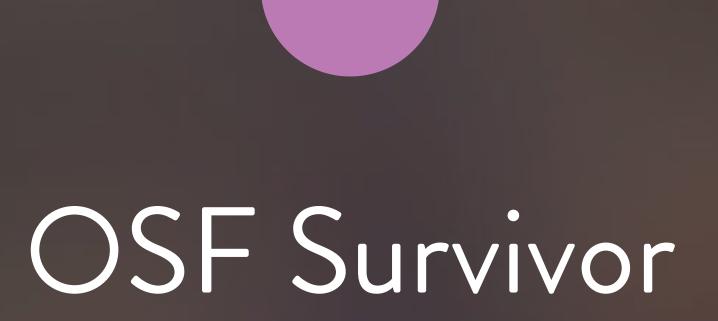

For our loved ones with the most difficult to treat cancers, the OSF Breakthrough Treatment Center is a transformative platform for the most promising medical breakthroughs and clinical trials from around the world.

BREAKTHROUGH TREATMENT CENTER

Breakthroughs in surveillance and monitoring recurrence can be crucial in improving outcomes and patient survival
