

# From Innovation to Impact: How Connected Care is Changing Heart Failure Management

OSF Ventures

TODAY

ENDOTRONIX®

## PROBLEM TRYING TO SOLVE

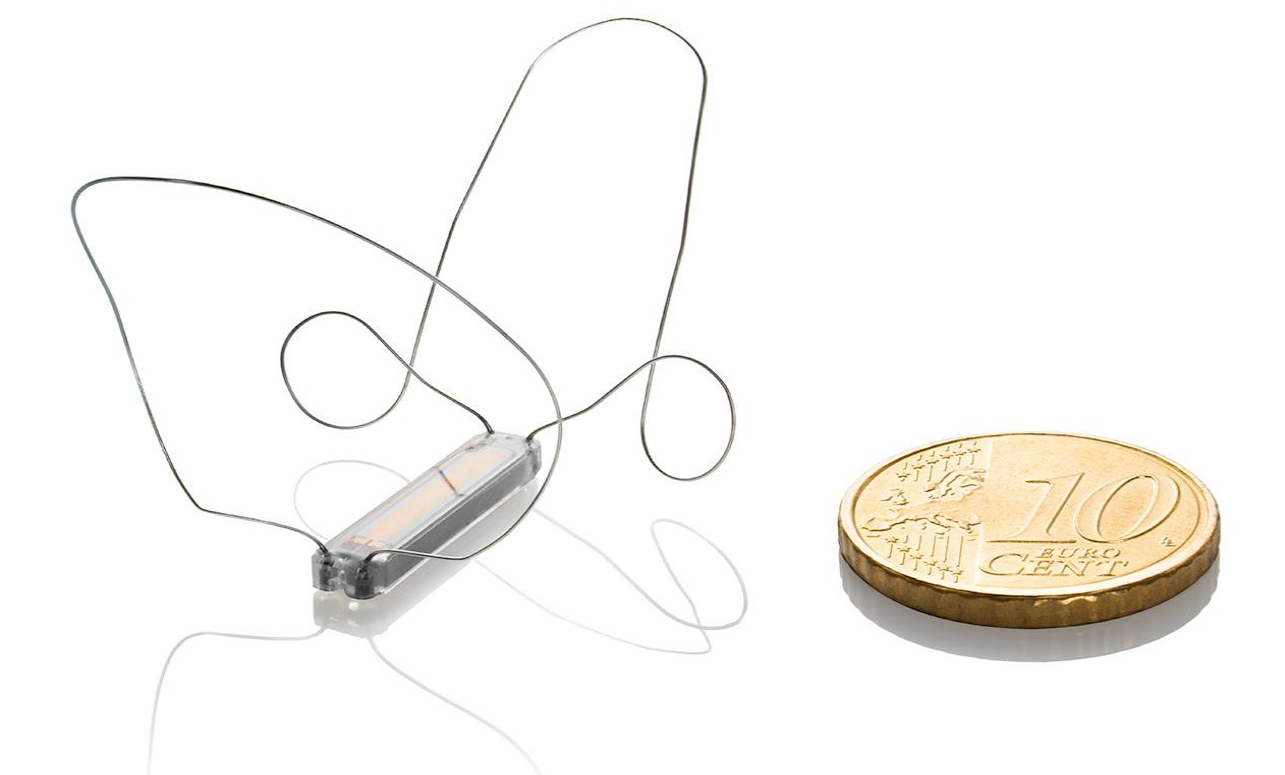

- Heart failure (HF) is a debilitating, progressive disease that impacts everyday life
- 1 in 4 people will develop HF in their lifetime
- HF related death is increasing
- Only 0.1% of HF patients achieve optimal guideline-directed medical therapy

## IMPACT TO PATIENT

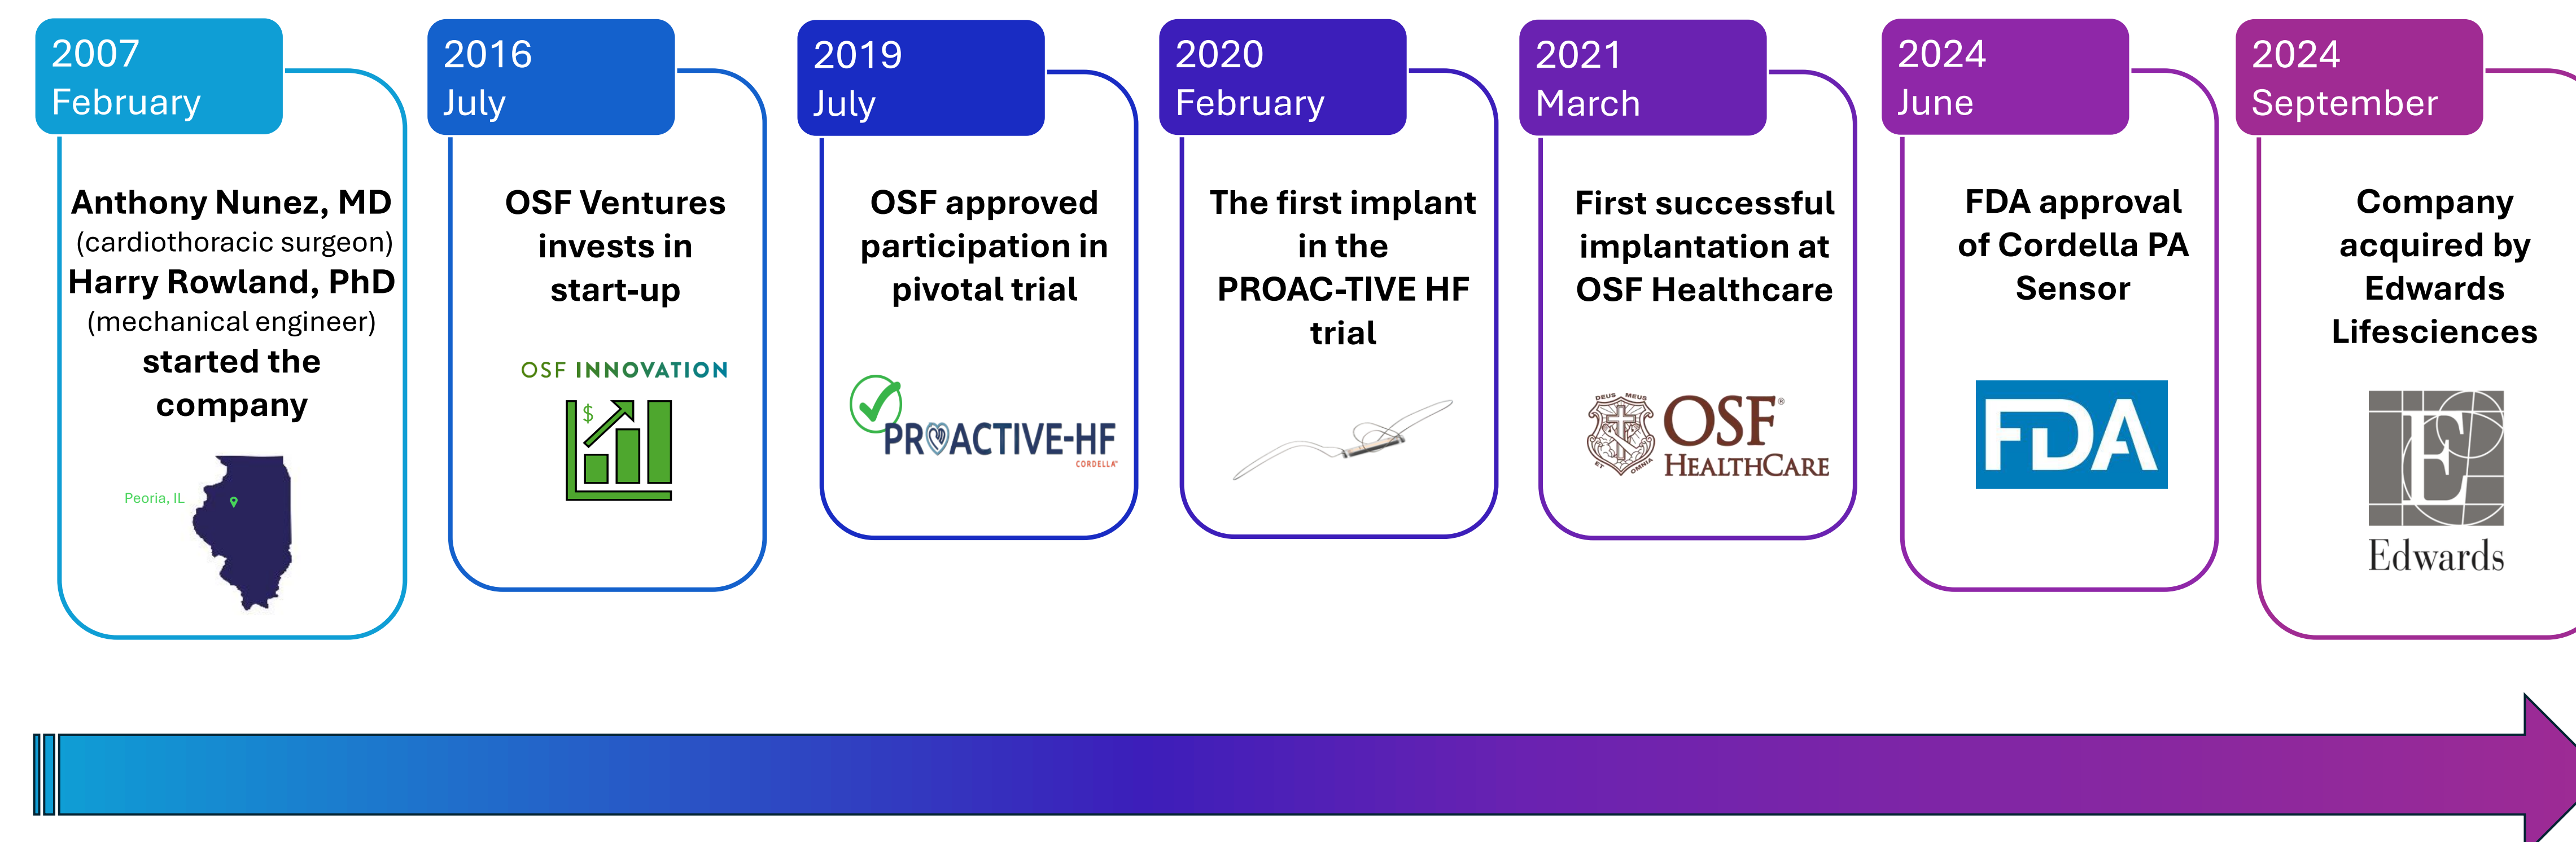

Wireless heart monitoring and care coordination platform for chronic heart failure (CHF) patients

- **Proactive** approach to HF management
  - PROACTIVE-HF trial demonstrated more optimal and timely dosing of key HF medications, significantly improving outcomes - a markedly low 0.159 rate of heart failure hospitalization and all-cause mortality at 6 months
- **Comprehensive** vital sign data
- **Engaging** patient and encourages self-awareness & sustainable lifestyle decisions
- **Creates** a connection to support meaningful improvements in patient health
  - PROACTIVE-HF trial demonstrated significant improvements in quality of life and HF biomarkers – 13.3% in 6-minute walk test; 10.5% in KCCQ<sup>1</sup>; 5.7% reduction in NT-proBNP levels

(1) Kansas City Cardiomyopathy Questionnaire is a 23-item, self-administered questionnaire designed to measure the impact of heart failure on patients' symptoms, physical and social function, and quality of life.

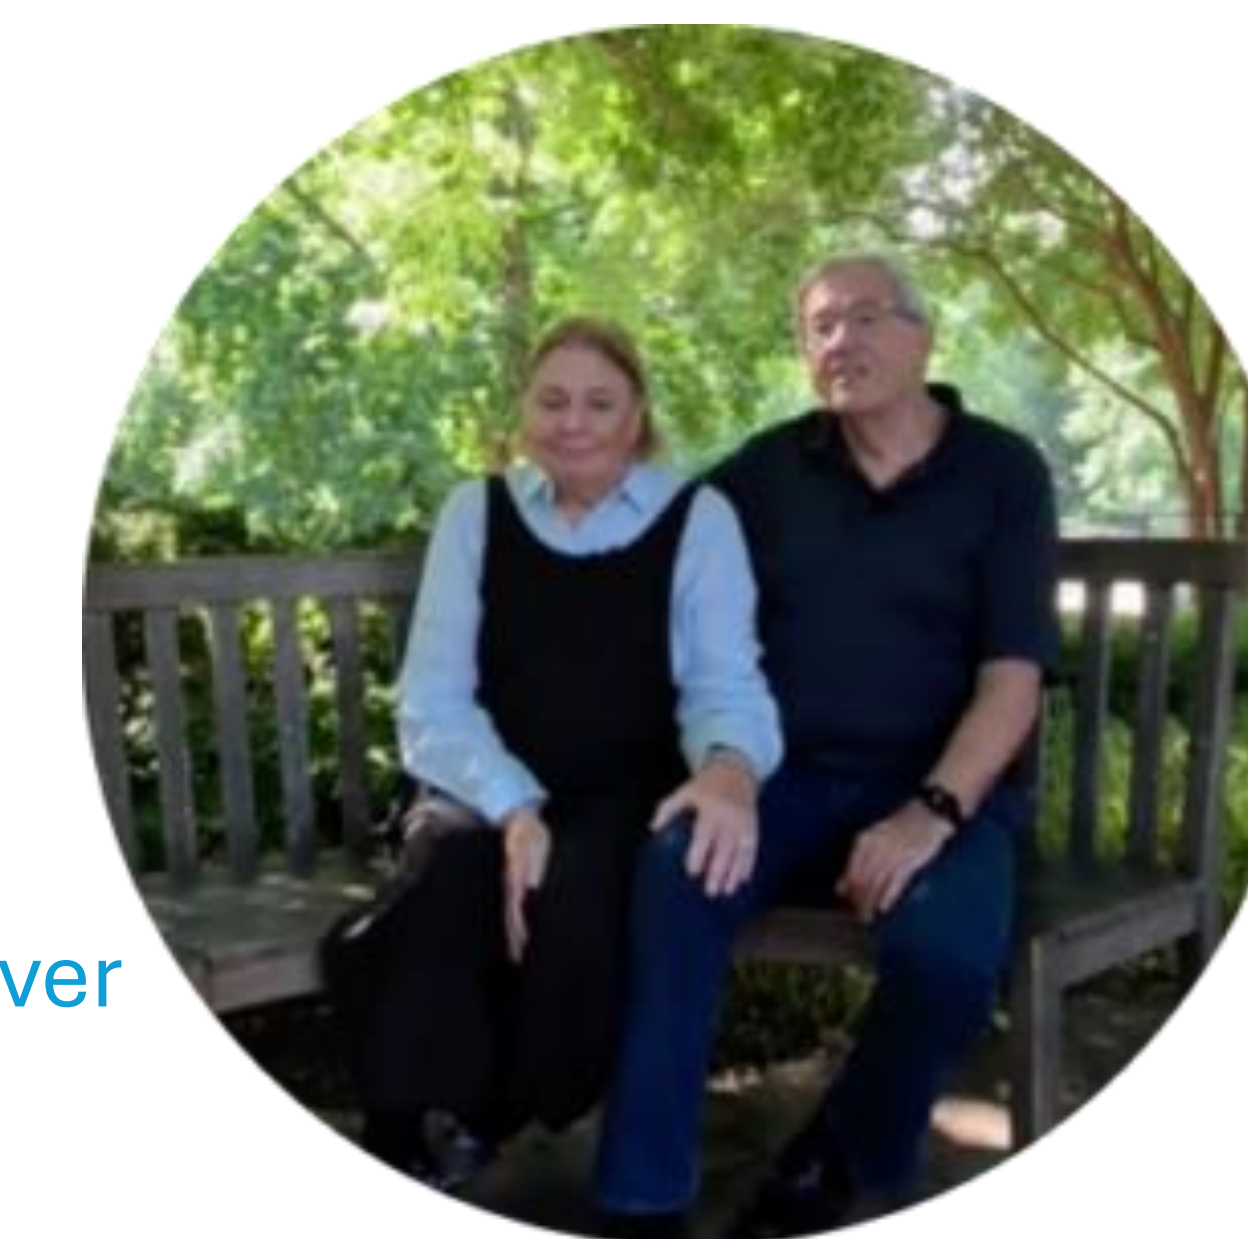

## JOURNEY TO GET THERE

## DIRECT IMPACT TO PATIENT & FAMILIES

*"Cordella is an amazing device. It's a tool that everyone should have access to. It is the future of medicine in our minds."*

Anita, Spouse & Caregiver

*"It is simple and takes me about 5 minutes a day to submit my reading and it all is Bluetooth to my iPad. I am more optimistic about my future"*

Tom, Cordella Implant Recipient

*"This device has the potential to greatly impact the care of patients with chronic heart failure and improve their quality of life"*
