# Knox County/Peoria Region Assessment of Mental Health Resources

## **Introduction**

Following a disaster it is likely that individuals affected by the disaster may have their mental health affected and may require the assistance of a mental health professional. However, due to the scarcity of mental health resources and access barriers, it may be difficult to link individuals to the services they need. It is the aim of this assessment, to create a list of mental health resources in and around Knox County, to provide better access for the mental health needs of those affected by the disaster. This assessment is intended to be a comprehensive list of available resources, although, it may not be an all-inclusive list of resources in the area. The inclusion of any resource in this assessment should not be taken as an endorsement for that resource; it is meant to provide only a list of options for individuals. This document is also not intended to diagnose or treat any medical or psychological conditions. Individuals should be referred to a medical or mental health professional for treatment and/or diagnosis.

## **Referral to Services**

This primary use of this assessment is to aid in referring individuals to mental health services following a disaster. This assessment is organized by type of service, and, based on the individual's needs, the location/availability of services and other factors such as insurance accepted by the service individuals can be provided with the services that fit their situation.

The types of services included in this assessment are:

- Parenting/family supports
- Structured social, recreational or creative activities
- Early childhood development (ECD) activities
- Safe spaces (e.g. child-friendly spaces)
- Psychological first aid
- Basic counseling for individuals, groups or families
- Interventions for alcohol/substance use problems
- Psychotherapy
- Individual or group psychological debriefing
- Pharmacological management of mental disorder (specialized and non-specialized health care providers)
- Inpatient mental health care
- Training / orienting
- Technical or clinical supervision
- Psychosocial support for aid workers
- Other
