

CHEMPACK

WHAT IS CHEMPACK?

- A part of the Illinois Department of Public Health, Office of Preparedness and Response, Medical Countermeasures (MCM) Program.
- CHEMPACK is a Federal (National) initiative to ensure antidotes are rapidly available to state and local emergency responders to enhance their capability to respond quickly to a large-scale nerve agent exposure.
- The mission of the program is to forward place a sustainable resource of nerve agent antidotes throughout the United States to expedite delivery of additional antidotes to locations that require them in the event of an emergency.
- In Illinois this forward placement occurs at hospitals.

WHAT IS CHEMPACK?

- 2 types of CHEMPACK Containers: EMS and Hospital
- EMS containers are designed for treatment by emergency responders-
 - antidotes are packaged in single use IM auto-injectors.
 - A percentage of the doses are designed for pediatric patients.
 - Intended for 454 casualties
- Hospitals containers packaged antidotes are in IV multi-dose vials to allow for dosage adjustments.
 - Medicines used in the emergency room
 - 85% packaged in multi- dose vials for lvs
 - Intended for 1000 casualties
