

Mission Partner GIVING

ONE TEAM • ONE SPIRIT • ONE MISSION

WHY I GIVE

Jason Bitner

Emergency Department Manager
OSF HealthCare Saint Luke Medical Center, Kewanee

I have been an OSF Mission Partner for over 10 years and currently serve as the Emergency Department Manager at OSF Saint Luke. My journey with OSF HealthCare began long before my career—I was a High School Volunteer at OSF Saint Francis Medical Center. The Mission has inspired me since I was young, and it continues to guide me in my work every day.

I give because of the patients we serve and the Mission Partners I work alongside every day. Giving back is my way of helping those who are important to me and my family. If sharing my story inspires even one person to give who hadn't considered it before, then it's worth it. Needs, support in difficult times is essential. Donations have helped many Mission Partners in need, a true testament to our Mission.

What I love most about my role is that we have the chance to provide both cures and hope at some of the most difficult moments in a patient's life. That's why I give—to help ensure that those who need care the most have the support and resources to get through their hardest days.

I've also seen the impact of donations firsthand. Through the foundation, we were able to fund a Lucas Device for the Kewanee Fire Department—just one example of how generosity can make a real difference.

ONE DONATION *can make all the difference!*
