

Immunization History

OSF HealthCare Saint Francis Medical Center's policy mandates immunization history be current and up to date **PRIOR** to placement as a volunteer.

Before we call you for an interview, you need to provide documentation of immunization records for:

- MMR
- Varicella
- Tdap (within the last 10 years)
- Flu vaccine (annual)

Immunization records can be obtained at your physician's office, health department, or the high school/college you attended or are currently attending. Please fax, email, or mail documentation to our office. If you cannot find your records for MMR and varicella, we can arrange for you to have titers drawn.

If you have any questions, please contact Volunteer Services at 309-655-2118. Thank you!
