

# Region 1 EMT-B Standing Medical Orders

## Study Guide

Time frame for 12 lead acquisition?

Moderate anaphylactic reaction medication guidelines?

Risks of epinephrine use on acute bronchospasm?

Causes of low EtCO<sub>2</sub>?

EtCO<sub>2</sub> waveforms and their meaning?

Resuming CPAP after nitroglycerin administration?

CPAP contraindications?

Suspension Trauma treatment?

Crush injury treatment?

POLST/DNR form use?

Excited delirium approved medications?

Name the types of Early Alert Notifications that should be given to the receiving hospital?

Contraindications for MAD device?

Medications for pain management that can be used by the EMT-B?

Narcan use?

Sepsis Alert criteria?

Signs of decompensated hypovolemic shock?

Transport Template?

Rules for transportation of a service animal with a patient?

Describe the FAST scale for stroke assessment?

Contraindications for the administration of aspirin?

Narcotic dependent patients and Narcan use?

Oral glucose administration criteria?

Nitroglycerin use with pediatric patients?

Epi Auto-Injector administration guidelines? Indications and Contraindications?

What does a duo-neb consist of?

Naloxone administration?

Nitroglycerin administration by EMT-B's, know what you can and cannot do?

Routes of administration for EMT-B medications:

Albuterol

Epi Auto-injector

Naloxone

Nitroglycerin

Aspirin

Glucagon

**What are the indications for use for the following medications:**

Albuterol \_\_\_\_\_

Aspirin \_\_\_\_\_

Epi Auto-Injector \_\_\_\_\_

Duo-neb (Albuterol/Ipratropium) \_\_\_\_\_

Glucagon \_\_\_\_\_

Naloxone (Narcan) \_\_\_\_\_

Nitroglycerin \_\_\_\_\_

Oral Glucose \_\_\_\_\_
